PROFILE SUMMARY

I'm a front-end developer with around 4 years of experience. Most of my work has been with React, Next.js, and TypeScript — building websites that load fast and rank well on Google. I've worked on products used by 10,000+ people and I enjoy fixing performance issues and making things run smoother. Right now I'm looking for a good team where I can keep doing this kind of work.

SKILLS

Main: React.js, Next.js (SSR, SSG, ISR), TypeScript, JavaScript, Redux

Styling: Tailwind CSS, Bootstrap, HTML, CSS

Testing: Jest

Tools: Git, GitHub, CI/CD, Jira, WordPress

Also worked with: React Native, Node.js, Vercel, MongoDB, Redis, Cloudflare Workers, Fastlane, K6 ,R2

EXPERIENCE

NadCab Labs — *Prayagraj, India*

Frontend Developer — Oct 2025 – Aug 2026

(Laid off during company-wide restructuring)

- Built Next.js apps using **SSR**, **SSG**, and **ISR**. Worked on making pages load faster and show up better on Google.
- Connected **REST APIs** and cleaned up how the frontend rendered data.
- Added SEO **meta tags, structured data, and dynamic sitemaps.**
- Used **Cloudflare Workers** and **Redis** for caching. Wrote **K6 tests** to check how the site handled heavy traffic.
- Shipped 8+ React Native screens for the mobile app and automated iOS/Android releases via Fastlane, reducing deploy time from 45 min to 10 min.

Knackhelp consulting services — *Noida, India*

Senior Software Developer — Jan 2025 – Sep 2025

- Led frontend development using **Next.js, React (web), and React Native (mobile)** of a portal for **10,000+ users, improving load performance by 40%** across web and mobile.
- Managed client projects via Jira, improving delivery efficiency by **25%** and achieving **100% on-time milestone delivery**.
- Introduced rigorous testing protocols, boosting coverage to **95%** and cutting production bugs by **70%.**

Spring time software solutions pvt ltd — *Noida, India*

Web Application Developer — Oct 2022– Dec2024

- Built scalable and responsive web applications using **React and Next.js**, integrating with .NET MVC backends.
- Executed a frontend React migration, boosting Lighthouse scores by 30 points.
- Worked directly with clients on requirements and quality assurance.

cs64org *Faridabad, India*
Frontend Developer (Intern) Aug 2021– Oct 2022

- Improved site speed by **25%** through image and code optimization.
- **Collaborated** within a **team** to meet **project goals**, contributing UI improvements focused on usability and design. Worked on **e-commerce workflows**, assisted in **React/WordPress front-end** tasks, and gained exposure to **website optimization**.

PROJECTS

DigiGo — AI-Powered Hotel Guest Experience Platform -Link
Tech Stack: Next.js, React.js, React Native, Node.js, MongoDB, PostgreSQL, Tailwind CSS, REST APIs, Cloudflare, Redis, Cloudflare R2, Fastlane, Anthropic AI, Vector Database

- Built web and mobile experiences for hotel guest check-in/check-out, in-stay services, and digital commerce.
- Integrated facial verification using face capture and vector database matching.
- Used Anthropic AI for image processing, bulk data seeding, and price suggestions.
- Worked with Cloudflare R2 for storage and Redis for caching.
- Contributed to cross-platform development and mobile release workflows using React Native and Fastlane.

Akoi Mart — E-commerce Platform -Link
Tech Stack: Next.js, React.js, JavaScript, REST APIs, Bootstrap

- Built 15+ responsive pages and 20+ reusable components for the e-commerce platform, cutting new page development time by 30%
- Designed and implemented REST API endpoints to support application features and frontend data workflows.
- Connected frontend pages with APIs to handle dynamic data rendering and user interactions.
- Structured reusable components and page-level logic to improve maintainability and consistency across the application.
- Handled API responses and application states to deliver a reliable user experience across different screen sizes.

Education World — Online Book E-commerce Platform -Link
Tech Stack: Next.js, React.js, JavaScript, REST APIs, Bootstrap

- Engineered frontend pages and reusable UI components for an online book-commerce platform.
- Designed and implemented API endpoints to support frontend features and application data workflows.
- Linked APIs for dynamic book listings, product details, pricing information, and shopping-related functionality.
- Implemented responsive layouts and reusable components to maintain consistency across pages.
- Worked with Redis/Upstash caching to improve data retrieval efficiency, where applicable.

EDUCATION

Dr. K.N. Modi Institute of Engineering and Technology Ghaziabad, India
Bachelor of Computer Applications 2021
